Integra Global is a company with solid experience in both domestic and international markets, it operates as a strategic mandate partner in the global commodities trade. The company connects Brazilian producers to international markets across the agricultural, animal, mineral, and fertilizer sectors.

With an end-to-end operation spanning market analysis, logistics execution, and regulatory compliance, Integra distinguishes itself through its expertise in navigating international complexities without compromising agility with legal security.

Integra is committed to ESG principles, which have been embedded in the company's governance since its foundation. This is supported by a team certified by the UNFCCC in Carbon Management and REDD+. Integra positions itself as a preferred partner for companies that require socio-environmental credibility to access increasingly demanding global markets, transforming compliance into a sustainable competitive advantage.

For investors, Integra represents a platform with a proven track record, international governance standards, and the ability to generate value across the entire global intermediation chain.
